PAST PROJECTS

AVIEW INTERNATIONAL (2021-2022) - Canada: AVIEWINT.COM

- The mission is to build content creator brand globally through translated subtitles and voice overs.
- Maintained focus on speed and accessibility of the web app.
- Built fully with Next JS

SPACEET AFRICA (2021-2022) - Africa: SPACEET.COM

- Spaceet Africa is a technological-driven startup with a focus on luxurious service apartments and short-lets rentals.
- Worked alongside two developers for the complete design and implementation of all UI designs and API cross implementations to allow data fetching and sending from and to the backend database.
- Optimized and lazy loaded some components to allow speed, performance and good user experience across the user, host and admin ends .

GODAN LOGISTICS (2020-2021) – Lagos, Nigeria: GODANLOGISTICS.COM

- A logistics company solving small and medium businesses delivery issues at affordable and pocket friendly prices.
- Singlehandedly converted all User Interface designed on Figma to code, maintaining pixel perfection and optimizing images for speed and best user experience.
- Implementing best practices in using React Components to consume APIs from the backend and create a more seamless user experience.

GRAZAC (2019-2020) - Ogun, Nigeria: Grazac.com.ng

- Worked as an junior frontend dev, designing static/interactive, responsive and functional websites to support and speed up work processes and reduce burnout of senior developers.

RCCG ATTENDANCE COUNTER (2020): RCCG-SOE.VERCEL.APP

- Weekly church and program attendance counter build with Next JS. Project was built to have dynamic passwords so users can login uniquely.

WEATHER APP (2019) PERSONAL PROJECT: WEATHER APP

- Solely built an up-to-date weather app that renders weather information based on location.
- Connected to an API to get live and current and accurate weather predictions and help with weather prediction.

EDUCATIONAL BACKGROUND

- Bachelor of Engineering, Mechanical Engineering, Olabisi Onabanjo University, 2020
